

Solidworks for Electronic Industry

Critical Business Issue's (CBI) encountered by this Industry based on 3D Mechanical CAD

- Quick and Updates BOM
- Standardization on Part/Assembly/Drawings
- Sheemetal
- Electronic Standard Library
- Single Line Diagram with Symbol on drawings
- Structure Cut-List
- Customized Library of Hardware and Bought Outs
- Large Assembly Management
- Accurate Weight
- Animation of Product Behavior
- Readable Fabrication/Machining/Casting /SLDDrawings
- CAD File Handling Issue's
- Electrical/Harnessing
- Electrical/Harnessing Standard Fitting Library
- 2D to 3D Conversions
- Service Manual /Product Cataloged
- Interference Detection
- Parametric Design
- PCB Layouts
- MCAD/ECAD Collaborations
- keep-out/keep-in areas, locations of major components

To resolve all above Problems Following Training is proposed

- ✓ Solidworks Modeling

- ✓ Solidworks Assembly
- ✓ Solidworks Drawings
- ✓ Solidworks Structure Design
- ✓ Design Automation for Standardization
- ✓ Solidworks Animation
- ✓ 2D to 3D Conversions
- ✓ Solidworks Composer for Service Manual
- ✓ Solidworks ToolBox (Hardware) Configuration
- ✓ Solidworks Rendering for Sales and Marketing
- ✓ Solidworks Parametric Approach
- ✓ Solidworks CircuitWorks
